TRU CHALLENGES & OPPORTUNITIES

Presentation to House Higher Education Committee
February 4, 2015

Eastern Oregon University  ■  Oregon Institute of Technology  ■  Southern Oregon University  ■  Western Oregon University
TRU Challenges

Student Costs  Student Supports  System Change
Student Cost Pressures Trending Up

Students bear increasing share of total costs

Grant aid helps but not enough

Borrowing growth puts pressure on most vulnerable, impacts ROI
<table>
<thead>
<tr>
<th>Access</th>
<th>Pre-college outreach is cut that brings in diverse, underserved students</th>
</tr>

Higher Education Reform: Promise Amid Cost Pressures

Shared Services, Decentralization Costs

Lean financial infrastructures taking on more risk, costs (capital match; need for fund balances)

Reaching unmanageable tuition levels that shut off access
Request of Legislature: What Oregon Students Need

Balance Aid, Tuition Relief with Campus Supports (no broken promises)

Help TRUs successfully transition so students don’t bear reform costs, or increase borrowing

Support learning facilities that train students for today’s and tomorrow’s workforce
# Student Opportunities Realized with Equitable State Support

## Access
- Outreach, accelerated credit, partnerships and pathways with K12 & community colleges

## Retention
- Increased support services for first-generation & under-represented students

## Student Aid
- Oregon Opportunity Grants & Sports Lottery support

## Grow Oregon
- Home-grown talent, increased per capital income, state revenue & progress on 40-40-20!
EACH UNIVERSITY IS UNIQUE
Using Growth and Innovation to Reach 40-40-20

- Add 5 new academic programs to respond to industry needs
- Double the number of online students through technology-enabled learning programs and technical platforms
- Reach 100 additional students with expanded student success services (retention outreach, tutoring, mentoring, college success classes) for first-generation, low-income and students with disabilities
- Increase graduation rates with Early Intervention Alert program for students struggling academically and provide increased supplemental instruction
- Expand STEM Hub activities in collaboration with school districts, colleges, businesses and community partners, including outreach to underrepresented students
- Manage through the downturns with fiscal prudence and planning
Focus on student needs and regional service

- Increase affordability with the **Eastern Oregon Advantage** to support and retain first generation, low income, and minority students for on-time and financially responsible graduation and success after college.

- Expand regional access of **Latino and under-served populations** to minority teacher and dual language education programs to create and showcase student exemplars that match state and regional demographics.

- Leverage early-college success of **Eastern Promise** and other high school programs by creating open admission pathways customized to student interests and needs.

- Connect students and faculty research through the **EOU Center for Rural Studies** to support economic development, services and resources for regional and community change and job creation through collaborations with rural communities, Latino and Native American populations.

- Align curriculum to meet regional needs through **EOU Regional Center** completion pathways from community college partners to enhanced BS/BA and Bachelor of Applied Science degree programs.
With increased investment from the State, Southern Oregon University would focus on three primary strategic objectives to support students and achieve the goal of 40/40/20:

- The recruitment of rural, first generation, and other underrepresented populations within our region by expanding initiatives (e.g. Pirates to Raiders) that create a stronger link between SOU and regional high schools.

- Persistence from Year One to Year Two for all students, with focus on rural and first generation students to create those connections critical to meeting the challenges of obtaining a degree.

- Support for students to complete their degrees, and be well prepared to fill both regional and state workforce needs.
Focus on Oregon and Oregon students

- Most “Oregon” of all public universities (over 80%)
- Higher graduation rates for Latino students and student athletes than general campus rate

Nationally recognized for excellence

- More national academic advising awards for excellence than all other Oregon colleges and universities and colleges combined (2008-14)
- Top school in Pacific NW in added value of degree (2014)

Leading Oregon into the future

- Applied Baccalaureate Programs for adult learners
- Active partner in Willamette Promise dual credit effort (2014)
- Bilingual Teacher Initiative with Hillsboro and Salem Keizer
- Student Enrichment Program supporting low-income, first-generation or students with disabilities.

Affordability supporting student success

- Western’s Tuition Promise established in 2007, freezes tuition for four years
- Textbook Rental Program saved students more than $1 million since 2012
- MAPS Credit Union Peer Mentors focused on increasing student financial literacy
THANK YOU FOR SUPPORTING OREGON’S STUDENTS

Jay Kenton, Interim President, Eastern Oregon University
Chris Maples, President, Oregon Institute of Technology
Roy Saigo, Interim President, Southern Oregon University
Mark Weiss, President, Western Oregon University
