## Oregon TECH

## 2016-17 Program Assessment Report

## Applied Mathematics B.S.

## Mission, Objectives \& Learning Outcomes

## Oregon Tech Mission

Oregon Institute of Technology, an Oregon public university, offers innovative and rigorous applied degree programs in the areas of engineering, engineering technologies, health technologies, management, and the arts and sciences. To foster student and graduate success, the university provides an intimate, hands-on learning environment, focusing on application of theory to practice. Oregon Tech offers statewide educational opportunities for the emerging needs of Oregonians and provides information and technical expertise to state, national and international constituents.

## Core Theme 1: Applied Degree Programs

Oregon Tech offers innovative and rigorous applied degree programs. The teaching and learning model at Oregon Tech prepares students to apply the knowledge gained in the classroom to the workplace.

## Core Theme 2: Student and Graduate Success

Oregon Tech fosters student and graduate success by providing an intimate, hands-on learning environment, which focuses on application of theory to practice. The teaching and support services facilitate students' personal and academic development.

## Core Theme 3: Statewide Educational Opportunities

Oregon Tech offers statewide educational opportunities for the emerging needs of Oregon's citizens. To accomplish this, Oregon Tech provides innovative and rigorous applied degree programs to students across the state of Oregon, including high-school programs, online degree programs, and partnership agreements with community colleges and universities.

## Core Theme 4: Public Service

Oregon Tech will share information and technical expertise to state, national, and international constituents.

## Program Alignment to Oregon Tech Mission and Core Themes

The Applied Mathematics Program aligns with the Oregon Tech Mission and Core Themes in the following ways:

- Core Theme 1: The Applied Mathematics Program is a rigorous applied program where students learn the skills needed to succeed in mathematically oriented graduate programs. In addition, graduates of the Applied Mathematics program are prepared to enter the workforce in a widevariety of professions both in the private and public sectors.
- Core Theme 2: The Applied Mathematics Program has approximately 45 to 50 students, most are earning dual degrees. The Junior/Senior courses have an excellent (low) faculty to student ratio and program advisors have a small number of advisees allowing for intimate learning and support environments. Students in the Applied Mathematics program are required to take 3 courses in Physics each including a lab section that provides hands-on learning environment. The Applied Mathematics students learn mathematical theory related to applications and solve problems analytically or by computer computation. In the case of computer computation, students write computer code employing numerical methods. As part of the degree requirement for Applied Mathematics, students choose to take a sequence of mathematically related courses that are applied in nature. These "external" focused electives are intended to give the graduate a breadth of applied knowledge.

## Program Mission

Graduates with the Applied Mathematics Degree will have knowledge and appreciation of the breadth and depth of mathematics, including the connections between different areas of mathematics, and between mathematics and other disciplines. They will be prepared for immediate participation in the workforce, or for graduate study.

## Program Educational Objectives

- Apply critical thinking and communication skills to solve applied problems.
- Use knowledge and skills necessary for immediate employment or acceptance into a graduate program.
- Maintain a core of mathematical and technical knowledge that is adaptable to changing technologies and provides a solid foundation for future learning.

## Program Faculty Review

Program Student Learning Outcomes and Objectives were reviewed by program faculty during Fall Convocation Program Assessment Meeting.

The program faculty met on September 20, 2017 in Owens 141 at 4PM. We reviewed the program mission and program student learning outcomes (PSLOs). The program faculty see no reason to make any changes.

## Showcase Learning Opportunities

In addition to coursework, students can participate in the department's colloquium series, attend regional mathematics conferences and/or compete in the national COMAP competition.

## Program History \& Vision

## Program History

The Applied Mathematics Degree was approved by the Oregon University System in the spring of 2006, and the program was implemented beginning in the fall of that year. We have had problems identifying our students because some of them are dual majors and do not need to declare themselves as an Applied Math major or have a math advisor until two terms before graduating. The program graduated its first student in the Spring of 2008, see the table below for graduation numbers.

## Meeting with Advisory Board

Program faculty held a meeting with their Advisory Board during the academic year.

## Advisory Board Review

The Advisory Board reviewed the Program Mission and Objectives during the academic year.

Program faculty held a meeting with their Advisory Board in the 2016-17 academic year.
Advisor Board (As of June 2007)

Applied Mathematics

## Program Enrollment

The Applied Math program has steadily grown since its inception. Currently we have approximately 40 to 50 majors, most of which are earning the math degree as a second or dual degree. The national trend for mathematics majors is approximately 1 to $1.5 \%$ of total student population. Oregon Tech seems to match the national trend (Klamath Falls has about 3,500 total students, $1.5 \%$ of 3500 is about 52 ).

Currently the Applied Math Major is not available to Wilsonville campus students. However, the department is working on offering our course math courses in Wilsonville by putting in place the necessary equipment for distance delivery. In other words, students in Klamath Falls will enroll in classes taught by Wilsonville faculty and vice-versa. The department is working with the IT department along with Wilsonville faculty with the goal of making the remote or dual offering of courses happen as soon as possible. One complication is the difference in course day/time between Klamath Falls campus
(traditional) and the Wilsonville campus (non-traditional). The number of additional math majors from Wilsonville is expected to be relatively small (less than 10).

Program Student Learning Outcomes Assessment Cycle

| PROGRAM STUDENT LEARNING OUTCOMES <br> 3-Year Cycle <br> Applied Mathematics B.S. | 2016-17 | 2017-18 | 2018-19 |
| :--- | :--- | :--- | :--- |
| OIT-BMTH 2016-17.1 Apply mathematical concepts and <br> principles to perform symbolic computations. | MATH 322 |  |  |
| OIT-BMTH 2016-17.2 Apply mathematics to solve <br> problems. |  | MATH 421 |  |
| OIT-BMTH 2016-17.3 Create, use and analyze graphical <br> representations of mathematical relationships. |  |  |  |

OIT-BMTH 2016-17.4 Communicate mathematical knowledge and understanding.

OIT-BMTH 2016-17.5 Apply technology tools to solve problems.

OIT-BMTH 2016-17.6 Perform abstract mathematical reasoning.

OIT-BMTH 2016-17.7 Learn independently.

MATH 452

MATH 311

## Assessment Map \& Measure

F - Foundation - introduction of the learning outcome, typically at the lower-division level,
$\mathbf{P}$ - Practicing - reinforcement and elaboration of the learning outcome, or
C - Capstone - demonstration of the learning outcome at the target level for the degree

For each outcome, programs should identify at least 2 direct measures (student work that provides evidence of their knowledge and skills), and 1 indirect measure (student self-assessment of their knowledge and skills) for each outcome.

For every program, data from the Student Exit Survey will be an indirect measure at the capstone level.

OIT-BMTH 2016-17.1 Apply mathematical concepts and principles to perform computations.

| Course/Event | MATH 322 |
| :--- | :--- |
| Legend | P - Practice |
| Assessment Measure | Direct - Exam Questions (essay or problem) |
| Criterion | $80 \%$ students receive Proficient |
|  |  |
| Course/Event | Student Exit Survey |
| Legend | C - Capstone |
| Assessment Measure | Indirect - Student Exit Survey |
| Criterion | $80 \%$ students receive Proficient |

OIT-BMTH 2016-17.6 Perform abstract mathematical reasoning.

| Course/Event | MATH 311 |
| :--- | :--- |
| Legend | C - Capstone |
| Assessment Measure | Direct - Exam Questions (essay or problem) |
| Criterion | $80 \%$ students receive Proficient |
|  |  |
| Course/Event | Student Exit Survey |

| Assessment Measure | Indirect - Student Exit Survey |
| Criterion | $80 \%$ students receive Proficient |

## Analysis of Results

OIT-BMTH 2016-17.1 Apply mathematical concepts and principles to perform computations.

| Criterion | Met |
| :--- | :--- |
| Summary | The program faculty met Sept 20, 2017 and reviewed the data from Math <br> 311 Winter Term (Instructor Randall Paul). We concluded the student <br> performance exceeds our expectations. This has been typical over the <br> years. Our students seem to do very well at symbolic computation. |
| Improvement Narrative | N/A |
| Attachment 4_LiveText_C1_Assessment_Report_2017_09_21_0125PM_23520 |  |
| Attachment 5_Outcome_1_Perform_Symbolic_Computation |  |

OIT-BMTH 2016-17.6 Perform abstract mathematical reasoning.

| Criterion | Not Met |
| :--- | :--- |
| Summary | The department has been assessing this PSLO for three consecutive years, <br> Winter terms, Math 311 (Instructors Deb, Fischer, Paul). We assessed <br> student performance on exam questions. We also had general discussion <br> about our opinions on the performance overall concerning abstract <br> reasoning. Our students seem to perform satisfactorily when asked to <br> make a routing statement of logic. See the results where we asked <br> students to state the contrapositive of a given statement. However, we <br> feel that too many of our students are not able to construct complete <br> proofs. This is despite given many opportunities to practice prior to <br> exams. We asked students to write a proof for a standard "epsilon/delta" <br> proposition. Students stumble with both the syntax as well as making <br> logical connections. |
| Improvement Narrative | Curriculum Change: We feel that our students are not being properly <br> prepared for Math 311 Real Analysis. While the prerequisite Math 327 <br> has some learning outcomes related to abstract reasoning, we decided <br> our applied math students need more. We met several times during the <br> 2016-17 year and concluded that a new course needed to be created. We <br> created a new course "Mathematical Structures", number to be <br> determined via CPC process. A CPC submission will occur Fall term 2017 <br> and we expect to start offering this new course Fall term. The CPC <br> submission will include this new course as well as relevant adjustments to <br> the catalog. This course will replace Math 327 Discrete Mathematics as <br> the prerequisite to Math 311 Real Analysis. The new Mathematical |
| Structures course will strongly address learning outcomes related to |  |
| abstract reasoning. We communicated with CSET program to ensure that |  |
| the new course will satisfy their needs so that students will dual |  |
| enrollment in MATH/CSET can take the new course instead of the current |  |
| MATH 327 requirement. Note: MATH 327 Discrete Mathematics will |  |

|  | continue to be offered, primarily for engineering students. The content of <br> MATH 327 will be slightly adjusted. |

Majors History, Fall 4th Week
November 30, 2016
The following data represents majors declared by student as of Fall 4th week. Students with multiple/dual majors have been reported
under each major in which they enrolled; therefore the student headcount will be duplicated. A small number of students that declared
a third major have now been included in this report. Data reported is combined for all levels and all locations.
Some programs may have had name changes such as CLS and have been reported as they were (historically).

## Additional Notes:

Numbers may not add to 100 due to rounding
na=not reported, or not available due to small sample size
METHODOLOGY
Sample Frame 2016: 781 degrees awarded per FAST
Survey Response Rate: 49\% Total Knowledge Rate 2016: 75\%
Sources: Data collected from a variety of sources. Below, for 2016, in chronological order:
Grad Fair paper survey
Faculty senior exit survey
Career Services survey
Career Services followup with non-respondents
Faculty information from their contact with students
LinkedIn Profiles
Salaries of \$2,500 and below and \$250,000 and above were deleted.
Students with dual majors are included under each major
Known Outcomes 2016: 587
Known Outcomes 2013/2014/2015 combined N=1008
Known Outcomes 2014/2015/2016 combined N=1244
