

To all our
state legislators
who worked tirelessly in the
2015 Oregon Legislative Session:

**THANK YOU
FOR KEEPING US**

Oregon **TECH**

IGNITED

Top 10 reasons you fire up our passions

1

Higher Education Budget: Oregon Tech students will have more access to faculty advisers, increased student success services such as peer consulting, mentoring and college success classes to make progress on increasing graduation rates, while maintaining reasonable tuition, and adding targeted remissions aid for students who are close to graduation.

2

ETIC Funding and the Oregon Talent Council: Oregon Tech will retain and hire new faculty to expand high-demand, high-wage education programs. We will use industry advisors from the new Talent Council to help us identify emerging marketing trends so students have the right skills for great jobs when they graduate.

3

Sports Lottery Funds: Over 300 students will have access to non-revenue and women's sports programs and scholarships that provide access, and build leadership and teamwork that improves student retention and graduation success.

4

Technical and Regional University Shared Services: Legislators ensured that the TRU university students did not bear additional expenses as a result of the unbundling of the university system. Thank you for putting students first.

5

Cornett Renovation/Center for Excellence in Engineering and Technology, Phase 1: Current and future generations of students in Klamath Falls will ultimately have access to a new 40,000 square foot building that is a safe, ADA-compliant, efficient engineering facility, with updated and improved classrooms and labs that meet workforce education needs, and set the stage for the full renovation of Cornett Hall.
