

**Note: Please watch the Teamwork Assessment Video before answering these questions.**

**Faculty Reflection on Assessment Results:**

- What surprises you about this data? What does not surprise you?
- What does this data reveal about our students' strengths? What does it reveal about our students' weaknesses?

**Reflection on Curriculum:**

- How can we as a department better support teamwork skills in our OIT students across all courses? What are your ideas?
- What refinements to our academic curricula would help support these outcomes better?
- What are your ideas for strengthening teamwork in your own courses in response to this data? What support would help you to do so?

**Reflection on Assessment Process:**

- Does our definition of this outcome adequately describe the knowledge and skills students need to succeed immediately post-graduation and over the course of their career (5, 10, 15 years after graduation)?
- Does the way we assess the outcomes (courses, assignments, scoring, etc.) capture evidence of whether students are achieving these outcomes?
